Trabalho 2 Métodos Formais

Alterações no arquivo 'test.cpp':

- Adicionar todas ações faltantes no 'switch'
- Utilizar funções correspondentes para cada ação
- Comparações entre 'expectde_bank_state' e 'bank_state'
- 'Assert' para parar verificação no primeiro erro ou diferença encontrados

Testes e Correções:

Erro - Saldo insuficiente para transferência

```
Transfering 37 from Bob to Alice
  - Bank State
Balances:
  Account: Alice, Balance: 37
 Account: Bob, Balance: -37
 Account: Charlie, Balance: 0
Investments:
 No investments found.
  – Expected Bank State –
Balances:
  Account: Alice, Balance: 0
 Account: Bob, Balance: 0
 Account: Charlie, Balance: 0
Investments:
 No investments found.
Actual error:
Expected error: Balance is too low
a.out: test.cpp:194: int main(): Assertion `error = expected_error' failed.
[1]
       88680 IOT instruction (core dumped) ./a.out
```

Correção - Adição Linhas 39-41:

```
string transfer(BankState &bank_state, string sender, string receiver,

string transfer(BankState &bank_state, string sender, string receiver,

int amount) {
   if (bank_state.balances[sender] < amount) {
      return "Balance is too low";
   };

bank_state.balances[sender] -= amount;
   bank_state.balances[receiver] += amount;
   return "";

string transfer(BankState &bank_state, string sender, string receiver,
   amount) {
      return "amount;
      return "";
}</pre>
```

Erro - Venda de investimento inexistente:

```
Selling investment with ID 10 from Alice
 — Bank State ——
Balances:
  Account: Alice, Balance: 0
  Account: Bob, Balance: 0
  Account: Charlie, Balance: 0
Investments:
  No investments found.
--- Expected Bank State ---
Balances:
  Account: Alice, Balance: 0
  Account: Bob, Balance: 0
  Account: Charlie, Balance: 0
Investments:
  No investments found.
Actual error:No investment with this id
Expected error: No investment with this id
```

Correção: Adição das linhas 63-66:

```
string sell_investment(BankState &bank_state, string seller,

if (bank_state.investments.find(investment_id) =

bank_state.investments.end()) {

return "No investment with this id";

bank_state.balances[seller] += bank_state.investments[investment_id].amount;

return "";

}
```

Erro - Comprando quantidade negativa de investimento:

```
Buying investment for -22 from Charlie
--- Bank State ---
Balances:
  Account: Alice, Balance: 0
  Account: Bob, Balance: 0
  Account: Charlie, Balance: 22
Investments:
  Investment ID: 0
    Owner: Charlie, Amount: -22
--- Expected Bank State ---
Balances:
 Account: Alice, Balance: 0
  Account: Bob, Balance: 0
  Account: Charlie, Balance: 0
Investments:
  No investments found.
Actual error:
Expected error: Amount should be greater than zero
```

Correção - Adição de verificação 'If (amount <= 0)'

```
string buy_investment(BankState &bank_state, string buyer, int amount) {
   if (amount \leq 0) {
      return "Amount must be greater than zero";
   }
   bank_state.balances[buyer] -= amount;
   bank_state.investments[bank_state.next_id] = {buyer, amount};
   bank_state.next_id++;
   return "";
}
```

Erro - Saque de quantidade negativa:

```
Withdrawing -19 from Charlie
— Bank State —
Balances:
  Account: Alice, Balance: 0
  Account: Bob, Balance: 0
  Account: Charlie, Balance: 19
Investments:
  No investments found.
 — Expected Bank State —
Balances:
  Account: Alice, Balance: 0
  Account: Bob, Balance: 0
  Account: Charlie, Balance: 0
Investments:
  No investments found.
Actual error:
Expected error: Amount should be greater than zero
```

Correção - Adição de Linhas 33-35

```
32 string withdraw(BankState &bank_state, string withdrawer, int amount) {
33  | if (amount ≤ 0) {
34  | return "Amount should be greater than zero";
35  |
36  | bank_state.balances[withdrawer] -= amount;
37  | return "";
38  }
```

Erro - Depósito de quantidade negativa:

```
Depositing -16 from Bob
--- Bank State ---
Balances:
  Account: Alice, Balance: 0
  Account: Bob, Balance: 49
  Account: Charlie, Balance: 0
Investments:
  No investments found.
--- Expected Bank State ---
Balances:
  Account: Alice, Balance: 0
  Account: Bob, Balance: 65
  Account: Charlie, Balance: 0
Investments:
  No investments found.
Actual error:
Expected error: Amount should be greater than zero
```

Correção - Adição das linhas 28-30:

```
string deposit(BankState &bank_state, string depositor, int amount) {
   if (amount \leq 0) {
        return "Amount should be greater than zero";
   }
   bank_state.balances[depositor] += amount;
   return "";
}
```

Erro - Transferência de quantidade negativa:

```
Transfering -35 from Charlie to Alice
 — Bank State —
Balances:
 Account: Alice, Balance: -35
 Account: Bob, Balance: 65
 Account: Charlie, Balance: 95
Investments:
  No investments found.
--- Expected Bank State ---
Balances:
 Account: Alice, Balance: 0
 Account: Bob, Balance: 65
 Account: Charlie, Balance: 60
Investments:
  No investments found.
Actual error:
Expected error: Amount should be greater than zero
```

Correção - Adição das linhas 49-51:

Erro - Saldo insuficiente para saque:

```
Withdrawing 92 from Charlie
--- Bank State ---
Balances:
  Account: Alice, Balance: 0
  Account: Bob, Balance: 0
  Account: Charlie, Balance: -92
Investments:
  No investments found.
 — Expected Bank State —
Balances:
  Account: Alice, Balance: 0
  Account: Bob, Balance: 0
  Account: Charlie, Balance: 0
Investments:
  No investments found.
Actual error:
Expected error: Balance is too low
```

Correção: Adição linhas 40-42:

```
string withdraw(BankState &bank_state, string withdrawer, int amount) {

if (amount ≤ 0) {

return "Amount should be greater than zero";

}

if (bank_state.balances[withdrawer] < amount) {

return "Balance is too low";

}

bank_state.balances[withdrawer] -= amount;

return "";

45

}
```

Erro - Saldo insuficiente para comprar investimento:

```
Buying 46 investment from Bob
— Bank State —
Balances:
  Account: Alice, Balance: 0
  Account: Bob, Balance: -40
  Account: Charlie, Balance: 0
Investments:
  Investment ID: 0
    Owner: Bob, Amount: 46
— Expected Bank State —
Balances:
  Account: Alice, Balance: 0
  Account: Bob, Balance: 6
  Account: Charlie, Balance: 0
Investments:
  No investments found.
Actual error:
Expected error: Balance is too low
```

Correção - Adição linhas 68-70:

```
string buy_investment(BankState &bank_state, string buyer, int amount) {
    if (amount \leq 0) {
        return "Amount should be greater than zero";
    }
    if (bank_state.balances[buyer] < amount) {
        return "Balance is too low";
    }
    bank_state.balances[buyer] -= amount;
    bank_state.investments[bank_state.next_id] = {buyer, amount};
    bank_state.next_id++;
    return "";
}</pre>
```

```
Selling investment with ID 0 from Charlie
 — Bank State ——
Balances:
  Account: Alice, Balance: 58
  Account: Bob, Balance: 20
  Account: Charlie, Balance: 51
